

Amendments to the Specification

*Please replace the paragraph beginning on page 1, line 6 by the following amended paragraph:*

This application is a continuation of copending, commonly assigned Application No. 09/757,436, filed January 10, 2001, which is an application under 35 USC 111(a) and claims priority under 35 USC 119 from Provisional Application Serial No. 60/175,582, filed January 11, 2000 under 35 USC 111(b). The disclosure of these documents is incorporated herein by reference.

*Please replace the two paragraphs beginning on page 9, line 17 by the following amended paragraphs:*

Suitable conductive polymer compositions for use in devices of the invention are disclosed in U.S. Patent Nos. 4,237,441 (van Konynenburg et al), 4,545,926 (Fouts et al), 4,724,417 (Au et al), 4,774,024 (Deep et al), 4,935,156 (van Konynenburg et al), 5,049,850 (Evans et al), 5,250,228 (Baigrie et al), 5,378,407 (Chandler et al), 5,451,919 (Chu et al), 5,582,770 (Chu et al), ~~5,701,285 (Chandler et al)~~, and 5,747,147 (Wartenberg et al), and in copending, commonly assigned U.S. Application No. 08/798,887 (Toth et al, filed February 10, 1997), now U.S. Patent No. 6,130,597. The disclosure of each of these patents and applications is incorporated herein by reference.

The conductive polymer is in the form of a laminar element having first and second generally parallel major surfaces. The element is sandwiched between first and second metal electrodes, the first of which is attached to the first surface of the PTC element and the second of which is attached to the second major surface. Preferably, the electrodes are in the form of metal foils, although a conductive ink, or a metal layer which has been applied by plating or other means can be used. Particularly suitable foil electrodes are microrough metal foil electrodes, including electrodeposited nickel foils and nickel-plated electrodeposited copper foil electrodes, in particular as disclosed in U.S. Patents Nos. 4,689,475 (Matthiesen) and 4,800,253 (Kleiner et al), and in copending, commonly assigned U.S. Application No. 08/816,471 (Chandler et al, filed March 13, 1997), now U.S. Patent No. 6,570,483, the disclosure of each of which is incorporated herein by reference.

Copies of Documents

In accordance with 37 CFR §1.98(d), copies of the documents submitted by Applicants during the prosecution of the parent application are not being submitted. In accordance with the Official Gazette Notice dated July 11, 2003, waiving the requirement under 37 CFR § 1.98(a)(2)(i) for submitting a copy of each cited U.S. patent and each cited U.S. patent application publication for all U.S. national patent applications filed after June 30, 2003, copies of the remaining documents either cited by the Examiner during prosecution (all of which were U.S. patents) or newly cited (which is a U.S. patent), are not being sent. All of these documents are, however, listed on the accompanying Form PTO-1449, and Applicants will readily supply copies if needed.

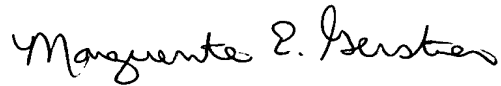

Fee

Applicants believe that because this Disclosure Statement is being submitted with the filing of this continuation application, no fee is due. If this is incorrect, please charge any necessary fee to Deposit Account No. 18-0560.

Conclusion

Allowance of this application at an early date is respectfully requested. If there are any outstanding issues which can be usefully discussed by telephone, the Examiner is asked to call the undersigned.

Respectfully submitted,

A handwritten signature in cursive script that reads "Marguerite E. Gerstner".
